Fear the walking dead season 4 episode 3

For those who feared that Fear The Walking Dead would be a quiet slog after the 90-minute, slower-than-normal premiere, these worries were probably put to rest during the second episode of the spin-off, So Close, Yet So Far. By now, the city of Los Angeles has gone from quiet anxiety to a series of inexplicable events to riots and chaos. By the end of the episode, all our heroes had met zombies, been caught up in protests and/or made plans to flee to the desert. With events unfolding so quickly, how long will it take for contemporary L.A. to move into the post-apocalyptic wasteland of The Walking Dead? When is the finale of season 1 of Fear The Walking Dead? The prequel series took a page from its predecessor's book, debuting with a short first-year season of only six episodes. That's just enough time to introduce viewers to the world of the show, tease them with exciting action, and let them salivate for more. With two episodes already out (and a week off for Labor Day), that means Fear will scare us for the last time on October 4th - just in time for season 6 of TWD at the premiere a week later, on October 11. In the interval, here's a list of seven things that must certainly happen before fear gives its last fright in four weeks.1 The Collapse Of The GovernmentConsidering that Rick Grimes was apparently only in a coma for four or five weeks, the company had to collapse fast enough so that the world would deteriorate as it was when he woke up. This raises an essential question: How did this happen? How was the U.S. military invaded by corpses in just over a month? What happened to the police, emergency services personnel, government officials? It's hard to imagine the United States collapsing so quickly, even in the face of a zombie plague.2. An ExplanationTWD author and creator of Fear Robert Kirkman has already announced that the spin-off will not directly answer the question of how the zombie epidemic began - but that certainly won't stop the public from asking. It just seems silly to create a prequel and then don't answer the most important question, doesn't it? But while Fear may have already provided enough clues to come up with some compelling theories, it would be nice to see the series at least drop some concrete clues... even if the exact origin is never scientifically proven.3. Urban Terror For five years, we've seen Rick and Co. tread the southern wilderness, with only occasional incursions into downtown Atlanta for a change of pace. So when the idea of running away to the desert was floated in the second episode, I moaned. Rather than another show about characters fighting zombies in the desert, it would be better for the fear of containing themselves in the claustrophobic surroundings of downtown Los Angeles. This visual aesthetic would separate him from his mother series, and could make through abandoned buildings and canyon streets.4. Creative KillsSeveral months after the original epidemic, walking corpses began to decompose severely, giving the production team of FREE TWD reigns to manufacture the most disfigured and horrible zombies imaginable. Zombies in Fear are fresher, which means they are inherently less interesting in terms of design and make-up effects. Authors should make up for this by having the characters kill the undead in an increasingly creative way. It makes sense, too, because in the early days of the apocalypse, people would experiment with the best ways to kill the undead. (On TWD, everyone already knows that a bullet, arrow or knife to the head is the quickest and cleanest way to send a walker.) 5. A major death Of course, it wouldn't be a spin-off of TWD if there weren't a few deaths of major characters in store. So far, only minor characters like Alicia's boyfriend and Madison's boss have kicked the bucket. There must be at least one major character death before the end of these six episodes to let viewers know that no one is safe. Perhaps the death of a central father? (Bye bye, Travis.) Or the shocking murder of an innocent young woman like Beth? (Watch your back, Alicia.) As long as they don't kill Tobias. This kid deserves to live.6 More FearFor a show with the word fear in its title, there has been an obvious lack of that particular emotion in both episodes so far. There have been many family dramas, some exciting action sequences, and some tension that the city devolves into chaos - but hardly any outright fear. This show needs some truly terrifying sequences to cement its place in the history of television horror. Think of the raptors in the kitchen scene at Jurassic Park, only with zombies instead of dinosaurs. Something that will really make us sit on the edge of our seats and afraid to turn off the lights.7 At Sense Of PurposeOut of all horror subgenres, zombie movies are perhaps the most constantly plagued by metaphor. The undead can come to symbolize so many different things, from our culture's senseless obsession with consumerism (Dawn Of The Dead), to our country's ugly history of occupation abroad (28 weeks later). The Walking Dead has sometimes struggled with this allegorical relevance, although at its best it is a compelling examination of human nature and the flaws inherent in our societal structures. So far, Fear's raison d'être seems to be on the surface: to show TWD fans how the zombie apocalypse began. And while this may be for a while, it is not enough to support the show in the long run. We all know what happens when a prequel focuses too intensely on a central question, like How did Anakin Skywalker become Darth Vader? without a deeper reason to exist. Fear must develop its own identity and purpose separate from its parent series, stat. Images: Giphy (7) Source: AMC The fifth episode of The Walking Walking season six, titled Now, is another side-step moderate, compared to the first three episodes. Now that things have calmed down some, the characters are left with time to reflect on these horrific events of the first three episodes. That said, there are no wow moments in this most recent episode, although writer Corey Reed and the director of the episode Avi Youabian dive into the arcs of some long characters. The lucky characters who are fleshed out (no pun intended this week) and are supported in front of the cameras, left to react to this world after the attack of the wolf are Jessie Anderson (Alexandra Breckenridge), Aaron (Ross Marquand), Deanna Monroe (Tovah Feldshuh), and Maggie Greene (Lauren Cohan). For some of these characters, the events of Now are useful and allow them to proceed in this apocalyptic world, but for others, it kind of holds them back, keeping them cynical and questioning the very foundations of Alexandria, and humanity. Those in the first category — Jessie, Aaron and even Denise Cloyd (Merrit Wever) — experience some kind of epiphany or are at least altruistic. Those in the latter category — Deanna and Maggie — are experiencing a kind of setback and continue to operate in a cloudy and divisive world. For them, all they have is either dead or missing; they can't waste time dwelling on greed at the pantry. Again, Now is an episode of character. There are no flashy scenes, no convincing chases through the dense forests outside the wall. Heck, Daryl is not in the show - which automatically disengages some of the TWD viewers. Nevertheless, there is a whole storm that these characters have to deal with. Maggie does so in a way that contextualizes her future, and Deanna suddenly, and in a fit of rage, relinquishes her power at the head of Alexandria. Although there are other characters featured - including Rosita (Christian Serratos), Carl (Chandler Riggs), Ron Anderson (Austin Abrams), and of course Rick - this is an episode that sets the scene moving forward, and adds some life to our disheartened Alexandrians (who, by the way, have to deal with half the group that has found its way to the wall). Highlights of the episode include Jessie's desertion from her previous apprehension to become violent, Rick's opening with her, Deanna's bloody encounter with a turned wolf, and Maggie's big revelation as she and Aaron move through the sewers under the community to find Glenn. What is this great revelation? Read on. Spoilers (specific) to come! Source: AMC The Return Episode opens with Rick jostling back to the community after being trapped in the RV. The throwing the door back open for him, but not too far behind is half of the mega-husband. Inside, the group decides to curl up, although most Alexandrians believe it is now officially the end of the world. Spencer the keeper Spencer Monroe (Austin Nichols) shares a poignant scene with his neighbors, warning them against looting the pantry on the heels of the walker While Spencer is noble right now, he yields later in the day, sneaking into the pantry to steal food and alcohol - where he proceeds to be the lookout for the community, a formula that does not add up completely. Deanna's amazement As for Deanna, she completely checks out of reality for the duration of this episode. We see her devise new plans for the community, also writing Dolor hic tibi proderit olim, which means pain will be helpful. As she struggles with looking to the future, and returning to her grief over Reg and her other son, she comes across a cowardly walker (once a wolf), which she proceeds to stab with a broken bottle about 20 times. A tactic she should have taken now, however: aim for the head! Maternity Aaron and Maggie share some powerful scenes in Now, for Aaron feels a little responsible for Glenn's disappearance because he lost his pack with the photos of the community, which was taken over by the Wolves in season five. So he decides to accompany Maggie on his quasi-journey to find Glenn. The two enter the sewers under Alexandria to pass the walkers who line up twenty (people) deep to the wall. After meeting two sludge walkers, the couple arrives at the end of the tunnel, but Maggie hesitates before moving into the territory of the walkers. What for? She's carrying Glenn's child! Aaron, the kind man he is, suggests that he consider Aaron or Erin for the baby. There's more And as for Jessie, well, she's been through all these last episodes (counting the end of season five). She has lost her husband, her son Ron is a little tamed, and to top it off, she is a bit passive when it comes to doing the job. In Now, however, Jessie comes a long way - she's struggling with parenting, feeding Sam (Major Dodson) a few cookies, and rick moving slowly but steadily. In the end, she killed a resident who turned around, and even did with the show's central character. That's right, and it's time: Rick and Jessie share a moment as he pleads with her to believe that there is something more to this apocalypse. And let's not forget: Denise and Tara (Alanna Masterson) also share an impassioned moment after the first one saved the life of an Alexandrian. Source: AMC It is obvious that showrunners intentionally weave in and out of the psyche of every important character in the Alexandrian walls (excluding Morgan, who filled the screen last week). Youabian movies Now with skill, but what a fan can really take away is the way the story settles. Again, it is confirmed that it is not only the environment that these people have to fight - it is themselves, their emotions, and their Next week, in Always Accountable, Daryl makes his long-awaited return to the small screen. Don't forget to catch the episode .m 9 p.m. on AMC. Catch The Walking Dead on Sunday at 21 .m. Check out Entertainment Cheat Sheet on Facebook!
